

August, 2011

Dear Mr. Hunzinger,

Thank you very much for your support thru the Richard Hunzinger Memorial Scholarship. It is because of your generosity that I am able to continue my schooling and pursue my dream; I greatly appreciate your kindness.

This will be my sophomore year at MSOE in the architectural engineering program. I continue to remain involved with many things here on campus. I am currently a tutor for all students in the fields of calculus and physics, I am a member of the American Society of Civil Engineers working with the steel bridge competition team, and involved with the school's tennis team. Although I am only entering my second year at MSOE, I have enjoyed every second of my time here thus far.

This will be my first year living off campus, giving me another challenge to overcome - being able to keep on my studies. I don't think this will be a problem for me, but hopefully, even something so small will be a good learning experience.

Upon graduation, I look forward to starting a career with any company that will allow me to be hands on as well as active with others. While still a few years from graduation, I look forward to where my career choices may take me and anticipate good things.

Again, I cannot express enough what your sponsorship means to me. Please pass my regards on to everyone involved. I look forward to a fun school year and promising future!

With sincere gratitude,

William Walters
