

Thank You.

Hunzinger Construction Scholarship Endowment

About Me

While at Marquette, I have become a member of ASCE, ACI as well as Chi Epsilon (a nationwide civil engineering honor society). I have also interned with two firms, Clear Horizons LLC and Collins Engineers, Inc. Outside of school and work, I love to be outside and help on my family's dairy farm in southwest Wisconsin.

My Marquette Experience

I am currently a senior in Civil Engineering with an emphasis in environmental work. I chose to attend Marquette for its rich tradition and history, as well as its knowledgeable and friendly faculty. After graduation, I plan to continue my education here at Marquette by pursuing a master's degree in environmental engineering and water resources.

I am Marquette

While at Marquette, I have most enjoyed the involvement of the faculty and alumni. Together they have created a great learning environment where advice is easy to come by and so worth listening to. Marquette has allowed me to expand my horizons and pursue my goals in the engineering field.

You are the Difference

Without the scholarship I have received, I simply wouldn't be attending Marquette right now. The generosity and compassion shown by the groups and families that donate are beyond thanks and have allowed me to thrive in academics and professional development. I would just like to say thank you and your generosity is deeply appreciated.

Kevin J. Berg

2012-2013 Recipient
Class of 2013
